NEW CDC GUIDELINES AFTER VACCINATION(S)

A little-known fact about me is that I have a close connection to someone working at the CDC, and I was informed that they will be releasing new guidelines regarding what's considered "safe" (is anything truly safe in Biden's America?) now that vaccines are available to everyone in the United States. Here's a sneak peak that my close contact sent me! They work at the CDC!

- human centipede with your roommates!
- make a blood brothers pact
- legally cook and distribute methamphetamine
- accidentally cook meth and distribute it, not knowing that it is meth
- let step-Betsy make the rules (but wash your feet first [or don't!])
- start a class war
- purchase and transport illicit drugs across state borders (I think this is allowed in the community care agreement)
- gaslight your non-roommate friends (see Manipulator Sheet)
- think about all of the terrible things your father probably did in the 80s
- confess your love for random sophomores/juniors with whom you've taken one class
- invite junior frat brothers to your apartment just so you can hang out with their girlfriends
- advocate for defunding the D*nisonian
- stop sending your professor *that* email
- eat a carbohydrate
- legally punch a police officer
- like literally beat the fuck out of them.

- stop going to chik fil a
- thank william kelsey
- show your vaccine card at Krispy Kreme for a free donut!
- stream Britney Spears album, Blackout (2007)
- call Nancy Pelosi a fucking lib
- build your girlboss empire
- finalize your divorce

-Charlie Schweiger, CDC liaison and avid believer that thinks Peeps szn was gone too soon

PRINCE PHILLIP IMY :(

One of the interview questions that we asked our applicants during interviews (only some of them though, because the only constant in this process was William Kelsey carrying the team on his back and asking the important questions), was what they think killed Prince Phillip (RIP). I've seen, heard and read other people's theories, so I was left thinking.. What did kill Prince Phillip? Here are some of my own theories.

- He drank a cotton candy flavored BANG energy drink
- Ate a PEEP (fun fact: they were made by union workers!)
- Stepped foot into the BS office and stroked from the amount of garbage left behind
- Listened to 100 geecs
- Heard my alarm go off in the AM
- Ate one (1) peach ring (produced in the US; red 40 will get you one way or another)
- Streamed *Chemtrails Over the Country Club* all the way through
- Discovered what white gays are
- Took a cube of regular sugar in his tea rather than his usual pinch of Stevia

- Tried Flamin' Hot Cheetos
- Was in the car when his driver went 3 km/h over the speed limit
- Was out-gatekept, gaslit, and girlboss'd one too many times by Queen Lizzy
- Found out that men under 5'8" have rights
- Hit a puffbar
- Tried incorporating tretinoin into his skincare routine
- Heard that Moderna's vaccine technology is being used to create an HIV vaccine
- Flew Spirit Airlines

-Charlie Schweiger, Royal Family Liaison, Moderna vaccine recipient, and virulently heavy sleeper

SIMULTANEOUSLY AN EXPOSE AND AN EVENT YOU SHOULD ATTEND

just out of curiosity, have u ever walked into the office and james was there working

He is always doing homeork in there when I come in

Or he is just messing around with shit on the computer

hey just out of curiosity, how often is james in the office when it's your night to edit?

Like every week. Normally he leaves eventually so I can edit but he's always in there when I get there

just out of curiosity, have u ever walked into the office and james was there working

or he was in the office

Delivered

yeah he always leaves so much trash

yeah like all the time
