REAL FAKE NEWS!

Alright guys, can I be real with you? Truth is, I've been getting real tired of solving the Wordle on the sixth try every damn day. To put the final nail in the coffin, I just read that Wordle was programmed by some loser on Reddit so his girlfriend would have sex with him. WTF?! First of all, the fact that Wordle is just an algorithm and not a real dude picking a random weird British word every day is very disappointing. Second of all, is that really the secret to getting laid? Making a puzzle game? It's time we test out this theory.

I have invented my own game, right here in the Bullsheet. I call it ~~Newsle Locker Room News~~ **Real Fake News!** The game is simple: I have just spent the day selecting **twelve (12)** real news headlines from this weekend. Each real headline has been broken up into three parts/components, and completely re-scrambled to form **twelve (12)** new fake news headlines, each with its own short little fake news blurb, written by me. Unscramble each headline to find the twelve original headlines, check your answers on the back of this sheet, and you win! The twist: **one of these headlines is real.** Happy unscrambling!
