

# THE BULLSHEET

The Bullsheet, a forum for news, humor, and community dialogue, is funded by DCGA, recycles, and is printed each day that classes are in session. Submissions must be sent before our editors shamble into the office for next day publication via email to: [bullsheet@denison.edu](mailto:bullsheet@denison.edu). Submissions herein solely reflect the opinions of the authors.

## **HIDDEN MICROPHONES FOUND ON CAMPUS**

*Anonymous  
Submission*

I've recently concluded my investigation on the hidden microphones across campus, and what I've found is haunting. Due to the ridicule and vague threats I've received from anyone I shared this information with, I'm presenting the results of my endeavor anonymously regardless of the fact they know who I am by now and that you "don't allow anonymous submissions". The prophetic words of Cassandra were discarded, but they likewise must be spoken. Though I have been faced with nothing but evasive responses from administrative faculty, what I've found cannot be ignored. The implications of my findings need to be shared with the general public; The Bullsheet is my final shot.

First appearing primarily in the atrium of the library, these hidden microphones are usually disguised as inconspicuous objects or nestled in unnoticed spots. I've frequently found them under the carpeting, but they can be found in anything ranging from pens to napkin dispensers to water bottles. These microphones are incredibly well hidden. By the end of Fall of 2024, I found at least 7 microphones. Since then, I've found a total of 54.

These microphones are small and inconspicuous. Small enough to be overlooked even if in plain sight right in front of you; inconspicuous enough to be dismissed as a "weird piece of plastic" according to my mother. I know what it is. I can feel its electricity, and if I listen I can hear it whirr. Should you suspect an object, say a coffee mug, of containing a microphone, the object must be completely broken apart. If nothing is found, then it's likely that it's hidden somewhere else in the room and you should leave immediately or hide to avoid campo coming to relocate the actual hidden microphone. A late night investigation in Burton Morgan revealed at least 5 microphones in a single classroom by looking into the vents.

When questioned about the purpose of these microphones, almost all administrative faculty did not reply to my inquiry. When I went in person, I was directed to the cluttered office of a man with a buzzy costume head on his desk aggressively stained blue who told me to sit down and then proceeded to listen to my questions but not answer while badly suppressing a giggle the entire time. He then smiled wider than you should be able to and said "you're done" before kicking me out and looking at his door behind me. When I returned the following day to try asking someone else for a semblance of clarification, I noticed his office was completely empty, no furniture and walls totally stripped. When I questioned the people there, they looked confused and then threatened to call campo when I got persistent.

Currently, I am in possession of at least 18 microphones, but the bulk of them disappeared during a 4 hour period of last week of which I have a gap in my memory. At the time of this letter, new appearances of microphones have completely stopped. The microphones I had left in place where I found them have disappeared. I believe they have found whatever it is they were listening for. In truth, I don't know what's coming. Whatever it is, I need this out there because the burden of this is crushing me. I'm not crazy, I have physical proof. Campo has been following me, and someone has been placing photos of car crashes under my door during the night. **Please don't ignore this. I'm very afraid and I only want answers.**
